About Us

"VENKATESH ENTERPRISES" one of the leading and the finest distributors and suppliers of this impeccable range of Fire Extinguishers and Safety Equipment, established its operations in the year 2000.

Located at Pune, Maharashtra (India), Venkatesh Enterprises is occupied in offering an assortment of Fire Fighting Supplies and Personal Protective Equipment such as Respiratory Protection, etc. Since we stepped in the industry in 2000 as a supplier and trader, we have proved our skillfulness in a significant manner. We entered the industry with a vision of complete customer satisfaction, which is also our sole aim as an organization. Our association with reputed vendors lets us prove our credibility to our precious clients. Our offered line of products comprises Chemical Mask, Escape Breathing Device, Face Protection, Fire Alarm, Metal Detectors, Personal Protective Equipment, Respiratory Protection, etc.

We obtain all fire fighting, personal protective and household products from trusted vendors to make sure quality is not compromised at any stage. Reaching highest quality standards by associating with established brands in the market, we prove our credibility and set a benchmark for quality in all aspects. Working under the direction of our professed mentors; we never make any compromises, while performing business activities that has drawn some famous clients to our organization such as Bharat Petroleum Corporation Ltd., Baramati Agro., and others.

SERVICES

Extinguisher Refilling

Refilling of fire extinguishers are used to make sure your extinguishers are prepared to handle a fire emergency at any given time. If you fail to schedule regular inspections to recharge your extinguishers, you increase your chances for equipment malfunction.

Extinguisher Servicing

Fire extinguisher servicing should be carried out once a year to the standard laid down under BS 5306-3:2009. The service procedure involves thorough checking of the fire extinguisher for corrosion and partial or complete discharge. Any fire extinguishers that are deemed unfit for use should be brought to the attention of the user and removed from service.

Extinguisher Maintenance

Maintenance procedures must include the procedures detailed in the manufacturer's service manual and a thorough examination of the basic elements of the fire extinguisher, including Mechanical parts of all fire extinguishers, Extinguishing agent, Expelling means, Physical condition.

Installation of Fire Extinguishers

Installation and Commissioning should always be carried out by a BAFE certified fire extinguisher service engineer if the extinguishers are required for business use. This ensures that the extinguishers are installed in the correct location, and are certified as a proof of correct installation and sufficient provision against the fire safety risks.
